

WORK EXPERIENCE

Not Really Bros LLC

April 2022 - Current

- Worked with ReactJs, JS(ES6), HTML, CSS to create custom web pages
- Analyzed existing web pages to increase performance, accessibility and improve user experience using Google Lighthouse
- Wrote reports informing client of analyzed web page and recommended remediations
- Configured DNS settings and deployed to internet via Netlify
- Created a static webpage for potential clients to display menu and store information

IBM

Software Developer / SAP Technical Specialist [IBM]

December 2018 - July 2020

- Created custom web applications using SAP's UI5 framework - JS (ES5), HTML, CSS, XML and oData RESTful APIs
- Worked with backend engineers to set up the correct data payload to be consumed by the frontend application.
- Created a dashboard for customer service representatives that allowed them to enter customer identification to pull up records, change information, see outages, send messages and see billing.
- Created an interactive map using google maps to show active outages in a customer area with details on the specific outage (Area, number of customers affected, outage reported, ETA of restoration).
- Created custom frontend application for creating orders with shipping information - weight, number of pallets, number of trucks for order. This application also allowed uploading orders using csv files
- Created custom frontend application for reviewing open orders, closing orders and reviewing financial records of orders.
- Consulted with project owners, business leads and UX designers to increase app efficiency and provide a better UX for the end user
- Worked in an Agile environment with a global team for efficient communication on evolving applications
- Integrated Fiori applications into the Fiori Dashboard
- Configured SAP environments for Fiori use
- Setup user accounts with security privileges and assign user roles on SAP servers.
- Troubleshoot Fiori applications - determined incorrect security roles, user roles and incorrect data payloads.
- Mentored web developer interns on their lessons and projects
- Acquired secret clearance for government contracts

Personal Programming Projects

April 2020 - Current

- Do I Have That Card - www.doihavethatcard
 - Created a card management website for Magic: The Gathering cards where users are able to sign in and log card collection
 - Used ReactJs, JS, HTML and CSS for development with ReduxJs for state management
 - Used Google Firestore for CRUD and Google Firebase for hosting.
 - Consumed Scryfall API for Magic: The Gathering card information to load into site.
 - Configured DNS settings and deployed to internet via Google Firebase
- Twitter Bot
 - Created a twitter bot using python
 - Listened for new tweets and was able to tweet responses
 - Utilized the twitter API

Nursing

Registered Nurse

July 2014 - Current
